

Free public lecture

# Here today, here tomorrow?

## Securing the future of our food

**Wednesday 27 August, 6 – 7 pm**  
**State Library of Victoria, Melbourne**

Growing evidence suggests climate change could seriously threaten agricultural production and the diversity of crops around the world. Join **Dr Cary Fowler** from the Global Crop Diversity Trust who will reveal how a rescue mission is underway as thousands of scientists, plant breeders, farmers identify and save as many crop varieties as possible.
