Overseas travel All staff consult University Health Service regarding travel immunisations and travel health								

All adults in the Australian community are recommended to take responsibility to maintain their immunity to tetanus, diphtheria, pertussis, polio, measles and mumps; this should be discussed with your own doctor or please call Occupational Health and Safety on 9905 1014 for specific advice if:

- you are unsure of your immunisation requirements
- you are working with an uncommon organism or animal not listed
- working conditions are not listed in this grid
- your risk assessment indicates that other immunisations may be required

For further information refer to [Procedures for Immunisation](#)
